Profile Highlights

- Results-driven Software Engineer bridging the gap between advanced algorithm optimization and real-world AI application development.
- Qualified **GATE DA 2026** and conquered **500+ LeetCode** algorithmic challenges.
 - Worked as an AI Data Evaluator at Outlier AI and trained LLMs maintaining a strict accuracy metric.

Professional Experience

- AI Data Evaluator Model Trainer** Outlier AI Oct 2024 - Jan 2025
- Maintained a consistent **95% QA** by strictly adhering to gold-standard evaluation benchmarks for Large Language Models (LLMs).
 - Enhanced model training outcomes by providing precise annotations and structured feedback on reasoning quality, correctness, and instruction adherence.

High-Impact Technical Projects

- Phoenix: Multi-Model AI Chatbot**
Tech Stack: React, Firebase, Python, Gemini API
- Integrated LLM providers (Gemini) with model switching and chat history using React + Firebase + Python API.
 - Recorded feature adoption: 31% voice inputs and 18% image inputs across 213 sessions (Firebase event analytics)..
- Credit Card Fraud Detection Pipeline**
Tech Stack: Python, Machine Learning, Scikit-learn, Pandas, NumPy
- Built an end-to-end ML pipeline for highly imbalanced transaction classification, including preprocessing, feature scaling, and model evaluation.
 - Achieved **AUPRC 0.073** (baseline fraud rate 0.002, 36× lift) and **ROC-AUC 0.962** on imbalanced transaction data; tuned threshold to reach fraud recall 82% at precision 79%.
 - Packaged training + evaluation as reproducible scripts/notebooks; documented assumptions and failure cases.
- Partner: Automated OS Voice Assistant**
Tech Stack: Python, pytest, OS Modules
- Developed a modular voice assistant to automate **10+ OS commands**(app launch, file ops, scheduling, API calls) using a command registry pattern.
 - Implemented structured exception handling and logging to reduce runtime failures and improve debuggability.
 - Wrote unit tests with **pytest**. (mention approx coverage or number of tests if you can).

Technical Skills & Certifications

- **Languages & Concepts:** Python, Java, SQL, JavaScript, HTML/CSS, OOPs, DBMS, SDLC, API Integration.
- **Frameworks, Cloud & Tools:** AWS, React, Tailwind CSS, PyTorch, Pandas, NumPy, Git, Firebase, Figma, MySQL Workbench.
- **Key Certifications:** Complete Agentic AI Bootcamp with LangGraph & Langchain (Udemy), Generative AI Productivity Skills (Microsoft/LinkedIn), Salesforce AI Agentforce Champion.

Education & Leadership

- Bachelor of Technology in CSE [IoT]** Dec 2022 - Jul 2026
Pranveer Singh Institute of Technology, Abdul Kalam Technical University **CGPA: 8.2**
- Campus Ambassador** — Rendezvous 2024, IIT Delhi Sep 2024 - Oct 2024
- Led outreach initiatives driving awareness and participation.
- Cabinet Member** — BASTION English Club Jan 2024 - Oct 2024
- Organized collaborative skill development and public speaking events.
